

Section	Criterion / Description	Marks
A. Project Work (60 Marks)		
	1. Paper Selection – Appropriate optimization paper	5
	2. Reason for Choosing – Clear justification	5
	3. System Architecture – Sockets, cores, caches, RAM, OS	10
	4. Understanding of Paper – Explanation, diagrams	10
	5. Implementation Accuracy – Correct optimization implementation	10
	6. Performance Evaluation – Baseline vs optimized	10
	7. Discussion & Insights – Improvement reasoning	10
B. Deliverables (40 Marks)		
	1. Full Report – Structure, methodology, results, review	20
	2. Summary Report – Concise 2–3 pages	5
	3. Code Quality – Readability, reproducibility	10
	4. Presentation – Clarity, accuracy, timing, Q&A	15
Bonus (Optional)	HPCG-Level Overall Analysis	15
